Kleo Fili

Junior Front-End Developer

kleofili60@gmail.com · 068 306 8605 · linkedin.com/in/kleo-fili-aa440036b · github.com/kleo2006

PROFESSIONAL SUMMARY

Entry-level front-end developer and Information Technology student who builds fast, responsive React applications and ships them from a blank repository to a live Cloudflare deployment. Four deployed projects: a Three.js portfolio, a full-stack food-delivery app with Stripe payments, a film-discovery app with an edge API proxy, and a business website for an IT services company. Strong in responsive and accessible UI, API integration and performance, and comfortable debugging problems and explaining technical solutions clearly. Seeking a junior front-end developer role.

SKILLS

Frontend React.js, JavaScript (ES6+), HTML5, CSS3, React Router, Vite, Bootstrap, responsive and accessible UI
Backend & Tools Node.js, Express, MongoDB, REST APIs, Stripe, Git & GitHub
Deployment & Performance Cloudflare Pages & Functions, lazy loading, image optimization
AI Tools Claude.ai, ChatGPT, Perplexity, Chatly.ai, V0.app
Other UI/UX basics, troubleshooting, bug fixing, problem-solving

PROJECTS & PORTFOLIO

Source code and live demos for every project below are on GitHub (github.com/kleo2006), deployed via Cloudflare.

Cinema — Film Discovery App

cinema-website.pages.dev

- Built a responsive React single-page app with React Router and lazy-loaded routes to browse films from the TMDB API: featured hero, trending and top-rated shelves, filterable Discover page, debounced search, and a watchlist with resume progress saved in the browser.
- Added a Cloudflare Pages Function that proxies and caches API requests, keeping the API key server-side and fixing load failures on networks that block TMDB.
- Designed accessible, keyboard-friendly UI (ARIA search combobox, reduced-motion support) that works from 320px phones to ultrawide screens, backed by unit and end-to-end tests.

Personal Portfolio Website

myportofolio-4x4.pages.dev

- Built a multi-section React + Vite site (Hero, About, Skills, Projects, Experience, Contact, Footer) with a custom Three.js cinematic background and full light/dark theming.
- Designed a cohesive CSS design system with glass-panel UI, scroll-reveal animations and an accent-color spectrum used across every component.
- Added an FAQ section, a certifications showcase, a validated accessible contact form and a sticky, scroll-aware navbar.

Food Delivery App

food-delivery-cte.pages.dev

- Developed a full-stack web application using React.js, Node.js, Express, MongoDB and Stripe.
- Implemented secure payments, a persistent cart and a dynamic user interface.
- Used AI prompts to speed up development.

NorthWind IT Services Website

northwind-website-3j7.pages.dev

- Developed a professional business website for an IT services company, focused on clean layout and service presentation.
- Designed and implemented a responsive UI using modern frontend technologies and user-friendly navigation.
- Optimized performance and accessibility for a better user experience.

IT SUPPORT & TROUBLESHOOTING

Skilled in bug fixing, troubleshooting and optimizing performance, with experience supporting web applications, assisting users and communicating technical solutions clearly.

EDUCATION

Bachelor's in Information Technology

Faculty of Natural Sciences, Tirana, Albania · 2023 — Present
